Lead-in Chamfers

The extrusion gap "E" is suitable for pressure up to 6000psi and temperatures up to 175 Deg F. For higher pressures or temperatures please consult with us prior to finalizing your design.

Operating Conditions:

rod

The operating conditions listed are based on our standard H-PU material and Delrin back-up ring. Other materials are available for special applications. In certain applications pressure rating can be increased with adjustment of extrusion gap E.
